**About me**  
[350chevy8@gmail.com](mailto:350chevy8@gmail.com)

I am full stack web developer focused on building applications using HTML, CSS and Javascript based technologies. My most used tech stack is React, Node, Express and MongoDB. I also have experience using:

Postgresql

Vue.js

React Native

WebSockets

CSS Flexbox and Grid

## **Experience**

### **Cinemaloop**

Part Time | December 2020 - Present

Cinemaloop is a social media platform being built for cinemagoers. It is built on React, Node, Express and

Mongodb with a REST API

[350chevy8@gmail.com](mailto:350chevy8@gmail.com)

Built the front and back end for movie information page, including Facebook style comments and reviews.

Integrated with the Google location API and built automatic geolocation and address autocompletion using a proxy server to protect API keys.

Decreased the load time of a REST API endpoint that was responsible finding users within a location search radius.

## **Litt**

Full Time | March 2020 - June 2020

Litt is a social media platform similar to Meetup.

Built feature for a mobile app using React Native

Updated a dependency with breacking changes (React-Router v3 => v5)

## **Hobbies**
